## 9. COMMENTS:

Consider the following:

- a) relationship to setting
  - b) associated traditions or stories
  - c) noteworthy features
  - d) comparison with others in area
- a) The site is located partially up a rise from an intermittent stream; it is surrounded by a woodland area in turn encompassed by well-drained farmland
  - b) No useful informants have been located
  - c) Constituting the site are:
    1. Area of probably mid-19th to early/mid 20th century rural residence, now demolished
    2. A brick-lined underground feature-probably a drain between the rubble pile and New Churchmans Rd.
    3. Two out structures (remains) tentatively identified as:
      - i) a barn (large above ground cement foundation) located southwest of the residence rubble pile
      - ii) a cistern (brick-lined underground feature) located south of the residence rubble pile
    4. An area of late 18th and early 19th century materials associated with underground structural remains
    5. A standing, although deteriorating, Springhouse of uninvestigated age across New Churchman's Road from the residence rubble pile
